

# Math Activities

## Let's Have Some Fun

Games can provide a fun, interactive way to practice math and number skills. Try some of these activities at home and let the learning continue!

**Directions:** Using flash cards, a deck of cards or other types of numbered papers, play one or all of the games below!

### Math War

With a partner and a deck of cards, or other numbered papers, divide the deck.

Each player flips one of their cards.

The player with the higher number wins! Keep playing until one player has all the cards!

### Track Your Knowledge

Check your facts! With a sheet of paper or chart, track your progress!

How many math facts did you get correct?

Celebrate your knowledge!

### Number Line

Time to mix it up!

Draw a number line on a piece of paper or use sidewalk chalk to create giant number line outside!

Choose a flash card and solve it! Find the answer on the number line and place the card on the line!

### Active Math

Create a list of active movements and match them to numbers.

Solve a math problem and match the answer to the list. Will you have to do 5 jumping jacks? Or, 10 hops on one foot?

Math can be interactive!!
